Abstracts
  Proceedings of the Renal Association, London, England,
    October 28, 1971, 197
    February 2, 1972, 428
Acetazolamide
  effect on proximal reabsorption, 100
Acetylcholine
  effects on water transport and intercellular space
    formation in toad bladder, 145
Acid-base homeostasis
  cardiovascular and pulmonary function, 375
  hydrogen ion secretion, 280
  intracellular pH, 341
  metabolic alkalosis, 306
  metabolic consequences, 347
  regulation of CSF pH, 360
  renal acidosis, 322
  renal ammonia production, 297
  role of diet, GI tract and bone, 275
Acid-base symposium
  Introduction, 273
Acidosis
  cardiovascular and pulmonary function, 375
  metabolic consequences, 347
  regulation of CFS pH, 360
  renal, 322
Acute renal failure
  complication, 190
  excretory urography (abstr.), 197
  hemodynamics in myohemoglobinuric acute renal
    failure, 232
  renin-immunization, 406
Albumin
  plasma albumin and sodium reabsorption in nephrotic
    syndrome, 47
  tubular transport of albumin in aminonucleoside
    nephrosis, 3
Aldosterone
  in chronic renal disease, 156
  renal cytoplasmic and nuclear receptors, 210
Alkalosis
  cardiovascular and pulmonary function, 375
  generation and maintenance, 306
  metabolic consequences, 347
  regulation of CSF pH, 360
American Society of Nephrology
  date of meeting, 200, 271, 390, 430
Aminonucleoside
  tubular transport of albumin in aminonucleoside
    nephrosis, 3
Ammonia
  renal production, 297
Anemia
  adaption to anemia during dialysis, 263
Angiotensinase
  enzyme activities of juxtaglomerular apparatus, 78
Announcements
  see, 65, 134, 199, 271, 390, 430
Antidiuretic hormone
  effect on sodium transport, 224
  fluid movement in toad bladder, 145
  role in urinary concentration, 135
ASAIO
  availability of Vo. XVII of the *Transactions of the
    ASAIO*, 65, 199, 271
ATP
  effects on water transport and intercellular space
    formation in toad bladder, 145

Basement membrane
  dense deposit disease of basement membranes, 420
  structure and composition in glomerulonephritis,
    115
Basilic vein
  repositioning for hemodialysis, 124
Bicarbonate
  excretion during metolozone diuresis, 169
  excretion in renal acidosis, 322
  renal excretion, 280
Blood chemistries
  nomograms for prediction of changes during hemo-
    dialysis, 126
Blood flow
  in myohemoglobinuric acute renal failure, 232
  in patients with hypertension, 254
Blood gases
  blood gases in patients with artificial A-V fistulas,
    131
Bone
  role of bone in acid-base homeostasis, 275

Capillary perfusion
  and proximal reabsorption, 397
Carbonic anhydrase
  contribution to renal hydrogen ion excretion, 280
  dual effects of acetazolamide and furosemide, 100
Cardiovascular function
  in acid-base disorders, 375
Cerebrospinal fluid pH
  regulation, 360

* Abstracts of the Proceedings of the Renal Association, London, England, October 28, 1971, and February 2, 1972, are included in this index.

Chlorothiazide
comparison with metolozone, 169
distal blockade in nephrotic syndrome, 47
Chronic renal disease
aldosterone and electrolyte excretion, 156
complement activation in glomerulonephritis, 106
dense deposit disease of basement membranes, 420
nephrotic syndrome, 47
non-suppressible hyperparathyroidism, 38
red cell transport (abstr.), 198
structure of glomerular basement membrane in glomerulonephritis, 115
Cirrhosis
renal concentrating ability, 55
Coagulation
diffuse intravascular coagulation (abstr.), 429
Collecting duct
effect of vasopressin on sodium transport, 224
Compensatory hypertrophy
increase in number of nephrons, 391
Complement
complement activation in glomerulonephritis, 106
Complications
influence of early hemodialysis, 190
Computer
computer facilities and transplantation (abstr.), 197
Concentration
chemical and dimensional characterization of countercurrent system, 135
effect of prostaglandin in hypertension, 254
urinary concentration in chronic renal disease, 156
urinary concentration in cirrhosis, 55
Converting enzyme
enzyme activities of juxtaglomerular apparatus, 78
Cortical blood flow
in myohemoglobinuric acute renal failure, 232
Countercurrent system
chemical and dimensional characterization, 135
Cytoplasmic
relationship to nuclear aldosterone receptors, 210

Dense deposits
in disease of glomerular and tubular basement membranes, 420
Diabetes insipidus
countercurrent system, 135
Dialysis
blood gases and pH with artificial A-V fistulas, 131
decreased oxygen affinity for hemoglobin, 263
effect of dialysis on uremic complications, 190
estimation of weight loss, 182
nomograms for hemodialysis, 126
repositioning of basilic vein and femoral artery, 124
Diet
role of diet in acid-base homeostasis, 275
Diffuse intravascular coagulation
in renal disease (abstr.), 429
Diluting segment
effect of volume expansion on sodium reabsorption in diluting segment, 19
Dilution
in patients with hypertension, 254
volume expansion and sodium reabsorption in diluting segment, 19
Diuresis
acetazolamide and furosemide, 100
distal blockade in nephrotic syndrome, 47
furosemide and ethacrynic acid diuresis, 12
metolozone and chlorothiazide, 169
Diuretics
acetazolamide and proximal reabsorption, 100
ethacrynic acid and chlorothiazide in nephrotic syndrome, 47
metolozone and chlorothiazide, 169
proximal tubular effects of furosemide, 12

Editorial
glomerular filtration in single nephrons, 201
Introduction to acid-base symposium, 273
On the society's journal, 1
Enzymes
enzyme activities of the juxtaglomerular apparatus, 78
Erythropoietin
present status (abstr.), 428
Escherichia coli
susceptibility to E. coli infection (abstr.), 197
Ethacrynic acid
distal blockade in nephrotic syndrome, 47
proximal tubular effects of ethacrynic acid, 12
European Dialysis and Transplant Association
date of meeting, 65, 134, 200, 271
Extracellular fluid volume
as a determinant of proximal effects of furosemide, 12
effect of volume expansion on sodium reabsorption in diluting segment, 19
saline infusion and glomerular balance, 67

Femoral artery
repositioning for hemodialysis, 124
Fibrin
defibrination in nephrotoxic nephritis (abstr.), 198
degradation products in renal disease (abstr.), 428
Fistula
blood gases and pH in patients with artificial A-V fistulas, 131
Furosemide
dual action with acetazolamide on proximal reabsorption, 100
proximal tubular effects of furosemide, 12

Gastrointestinal tract
role of GI tract in acid-base homeostasis, 275
Glomerular filtration rate
in myohemoglobinuric acute renal failure, 232
in single nephrons, 201
Glomerulonephritis
complement activation in glomerulonephritis, 106
defibrination in nephrotoxic nephritis (abstr.), 198

dense deposit disease of basement membranes, 420
hypocomplementemic glomerulonephritis, 106
structure of glomerular basement membrane in glomerulonephritis, 115
vascular changes in experimental glomerulonephritis, 89
Glomerulotubular balance
saline infusion and glomerulotubular balance, 67
Glycerol
renin immunization in acute renal failure, 406

Hemodialysis
blood gases and pH in patients with artificial A-V fistulas, 131
decreased oxygen affinity of hemoglobin, 263
effect of dialysis on uremic complications, 190
estimation of weight loss, 182
nomograms for hemodialysis, 126
repositioning of basilic vein and femoral artery, 124
Hemodynamics
control of sodium excretion by dog kidney, 27
in myohemoglobinuric acute renal failure, 232
in patients with hypertension, 254
peritubular capillary perfusion and proximal reabsorption, 397
renal hemodynamics in aminonucleoside nephrosis, 3
saline infusion and proximal sodium reabsorption, 67
Hemoglobin
decreased oxygen affinity during dialysis, 263
Hemorrhage
gastrointestinal hemorrhage in acute renal failure, 190
Hepatitis
inclusion bodies in kidney, 413
Hereditary diabetes insipidus
countercurrent system, 135
Hydrogen ion
dual effects of acetazolamide and furosemide, 100
mechanism of renal excretion, 280
Hydrostatic pressure
capillary perfusion and proximal reabsorption, 397
effect on fluid movement and intercellular space formation in toad bladder, 145
glomerular pressure in acute renal failure, 232
Hyperparathyroidism
non-suppressible hyperparathyroidism in chronic renal disease, 38
Hypertension
prostaglandin in essential hypertension, 254
Hypertrophy
compensatory hypertrophy in young rats, 391
Hypocomplementemic glomerulonephritis
complement activation, 106

Infection
in acute renal failure, 190
urinary tract infection after nephrectomy (abstr.), 197
Intercellular space formation
determinants of formation in toad bladder, 145
International Congress of Nephrology
65, 134, 199, 271, 390, 430
International Society of Nephrology
membership requirements, 199, 271, 390, 430
Intracellular pH
review, 341
Iron metabolism
in chronic renal failure (abstr.), 429
Isolated kidney
control of sodium excretion by isolated dog kidney, 27
Isolated renal tubules
effect of vasopressin on sodium transport in cortical collecting tubules, 224

Journal
on the society's journal, 1
Juxtaglomerular apparatus
enzyme activities of the juxtaglomerular apparatus, 78

Kidney International
on the society's journal, 1
subscription, 199, 271, 390, 430

Liver disease
renal concentrating ability in cirrhosis, 55
renal inclusion bodies in acute hepatitis, 413
Lobular glomerulonephritis
structure of basement membrane, 115

Membrano-proliferative glomerulonephritis
structure of basement membrane, 115
Mercuric chloride
renin immunization in induced acute renal failure, 406
Metabolic alkalosis
generation and maintenance, 306
Metabolism in acid-base homeostasis
metabolic consequences, 347
Metolozone
comparison with chlorothiazide, 169
Mice
chemical and dimensional characterization of the countercurrent system, 135
Microdissection
microdissection of juxtaglomerular apparatus, 78
Micropuncture
determinants of proximal effects of furosemide and ethacrynic acid, 12
dual effects of acetazolamide and furosemide, 100
glomerular filtration in single nephrons, 201
peritubular capillary perfusion and proximal reabsorption, 397
saline infusion and glomerulotubular balance, 67
tubular transport of albumin in aminonucleoside nephrosis, 3

Myeloma
paraproteins and renal disease (abstr.), 428
Myohemoglobinuric acute renal failure
cortical blood flow and GFR, 232

Nephrectomy
susceptibility to infection after nephrectomy (abstr.), 197
Nephrogenic diabetes insipidus
countercurrent system and urinary concentration, 135
Nephron
increase in number in compensatory hypertrophy, 391
Nephrosis
tubular transport of albumin in aminonucleoside nephrosis, 3
Nephrotic syndrome
plasma albumin and renal tubular sodium reabsorption, 47
Nomograms
nomograms for hemodialysis, 126
Nuclear receptors
relationship to cytoplasmic aldosterone receptors, 210

Oncotic pressure
control of sodium excretion by isolated dog kidney, 27
plasma albumin and sodium reabsorption in nephrotic syndrome, 47
role of peritubular oncotic pressure in proximal reabsorption in aminonucleoside nephrosis, 3
saline infusion and proximal reabsorption, 67
Osmotic diuresis
during metolozone diuresis, 169
in patients with hypertension, 254
urinary concentration in cirrhosis, 55
Oxygen affinity
affinity altered in acid-base disorders, 375
decreased for hemoglobin in patients on hemodialysis, 263
Oxygen dissociation curve
in acid-base disorders, 375
in patients on hemodialysis, 263
review (abstr.), 429

Paraproteins
in renal disease (abstr.), 428
Parathyroid hormone
non-suppressible hyperparathyroidism in chronic renal disease, 38
Perfusion
peritubular capillary perfusion and proximal reabsorption, 397
pH
blood pH in patients with artificial A-V fistulas, 131
intracellular pH, 341
regulation of CSF pH, 360
Phosphate
excretion during metolozone diuresis, 169
phosphate excretion in non-suppressible hyperparathyroidism in chronic renal disease, 38
Plasma albumin
effect on sodium reabsorption in nephrotic syndrome, 47
Potassium
excretion during metolozone diuresis, 169
excretion in chronic renal disease, 156
intracellular potassium in uremia (abstr.), 198
Prostaglandin
in patients with essential hypertension, 254
Proximal tubule
effect of furosemide, 12
Pulmonary function
in acid-base disorders, 375
Pyelonephritis
susceptibility to injection after nephrectomy (abstr.), 197

Reabsorption
dual effects of acetazolamide and furosemide, 100
effect of prostaglandin on distal reabsorption, 254
peritubular capillary perfusion and proximal reabsorption, 397
proximal reabsorption during furosemide diuresis, 12
proximal tubular reabsorption in aminonucleoside nephrosis, 3
saline infusion and proximal reabsorption, 67
tubular sodium reabsorption in nephrotic syndrome, 47
volume expansion and sodium reabsorption in diluting segment, 19
Red blood cell
transport in uremia (abstr.), 198
Renal biopsy
in acute viral hepatitis, 413
Renal tubular acidosis
description of RTA, 322
Renin
comparison of bioassay and radioimmunoassay, 240
enzyme activity of the juxtaglomerular apparatus, 78
renin-immunization in acute renal failure, 406

Single nephron filtration rate
during furosemide diuresis, 12
during saline infusion, 67
editorial review, 201
Sodium
control of sodium excretion by isolated dog kidney, 27
dual effects of acetazolamide and furosemide, 100
effect of vasopressin on sodium transport, 224
excretion during metolozone diuresis, 169
excretion in chronic renal disease, 156
intrarenal hormones and sodium excretion (abstr.), 197
plasma albumin and sodium reabsorption in nephrotic syndrome, 47

saline infusion and proximal sodium reabsorption, 67
sodium deprivation and renin activity of juxtaglomerular apparatus, 78
volume expansion and sodium reabsorption in diluting segment, 19
Symposium
acid-base homeostasis, 273
Systemic lupus erythematosus
complement activation, 106

Thrombosis
diffuse intravascular coagulation (abstr.), 429
Toad bladder
determinants of intercellular space formation, 145
Transplantation
kidney transplantation and computer facilities (abstr.), 197
Transport
determinants of intercellular space formation in toad bladder, 145
dual effects of acetazolamide and furosemide, 100
red cell transport in uremia (abstr.), 198
relationship between cytoplasmic and nuclear aldosterone receptors, 210
saline infusion and proximal reabsorption, 67
tubular albumin transport in aminonucleoside nephrosis, 3
vasopressin and sodium transport, 224
volume expansion and sodium reabsorption in diluting segment, 19

Ultrafiltration
Contribution to weight loss during dialysis, 182
Urea
role of urea in countercurrent system, 135
Uremia
complications of uremia in acute renal failure, 190
intracellular potassium in uremia (abstr.), 198
iron metabolism (abstr.), 429
red cell transport in uremia (abstr.), 198
renal acidosis in uremia, 322
Urinary tract infection
susceptibility to infection after nephrectomy (abstr.), 197
Urography
excretory urography in acute renal failure (abstr.), 197

Vascular disease
experimental glomerulonephritis, 89
Vasopressin
chemical and dimensional characterization of countercurrent system, 135
determinants of intercellular space formation in toad bladder, 145
effect of sodium transport in isolated collecting duct, 224
Virus-like inclusion bodies
in acute hepatitis, 413
Volume
saline infusion and proximal reabsorption, 67
volume expansion and sodium reabsorption in diluting segment, 19

Water
determinants of water transport in toad bladder, 145
Water excretion
concentrating ability in cirrhosis, 55
countercurrent system, 135
during metolozone diuresis, 169
in chronic renal disease, 156
intrarenal hormones and water excretion (abstr.), 197
volume expansion and sodium reabsorption in diluting segment, 19
Weight loss
estimation during coil dialysis, 182

Contents for Volume 1

January—June, 1972

Number 1, January 1972

On the society's journal. *Roscoe R. Robinson* 1

Micropuncture study of tubular transport of albumin in rats with aminonucleoside nephrosis. *Donald E. Oken, Susanne C. Cotes, and Christian W. Mende* . 3

Determinants of the effect of furosemide on the proximal tubule. *Thomas J. Burke, Roscoe R. Robinson, and James R. Clapp* 12

The effect of volume expansion on sodium reabsorption in the diluting segment of the dog kidney. *Lewis J. Barton, L. Henry Lackner, Floyd C. Rector, Jr., and Donald W. Seldin* 19

Quantitative influence of non-hormonal blood factors on the control of sodium excretion by the isolated dog kidney. *A. Nizet* 27

Non-suppressible secondary hyperparathyroidism in chronic progressive renal disease. *Eduardo Slatopolsky, W. Ernest Rutherford, Phillip E. Hoffsten, Ivan O. Elkan, Harvey R. Butcher, and Neal S. Bricker* 38

Effect of plasma albumin on sodium reabsorption in patients with nephrotic syndrome. *Henry Grausz, Roger Lieberman, and Laurence E. Earley* 47

Renal concentrating ability in cirrhosis. III. Failure of hypertonic saline to increase reduced T^cH_2O formation. *Carlos A. Vaamonde, Jorge I. Presser, Liliana S. Vaamonde, and Solomon Papper* 55

Announcements 65

Number 2, February 1972

Effects of saline infusion on glomerulotubular balance. *Ettore Bartoli and Laurence E. Earley* 67

Enzyme activities of the single juxtaglomerular apparatus in the rat kidney. *Pierre Granger, Herbert Dahlheim, and Klaus Thurau* 78

Intrarenal vascular changes in experimental glomerulonephritis. *Norio Sawabu, Eisuke Takazakura, Akira Handa, Akira Shinoda, Akira Takada, and Jugoro Takeuchi* 89

Dual action of acetazolamide and furosemide on proximal volume absorption in the rat kidney. *H. W. Radtke, G. Rumrich, Eva Kinne-Saffran, and K. J. Ullrich* 100

Pathways of complement activation in glomerulonephritis. *Nancy H. Hoiland, Maria M. E. de Bracco, and Charles L. Christian* 106

Biochemical structure of glomerular basement membrane in chronic glomerulonephritis. I. Lobular and membrano-proliferative glomerulonephritis. *Philippe Mahieu* 115

Repositioning of the basilic vein and superficial femoral artery for chronic hemodialysis. *Bernard D. Nidus, David A. Tice, Robert Matalon, and Robert P. Eisinger* 124

Nomograms for the prediction of changes in patient chemistries during hemodialysis. *Matthew B. Wolf, Benjamin H. Barbour, and Philip D. Watson* . . . 126

Blood gases and pH in patients with artificial arteriovenous fistulas. *E. A. Santiago-Delpin, T. J. Buselmeier, R. L. Simmons, J. S. Najarian, and C. M. Kjellstrand* 131

Announcements 134

Number 3, March 1972

Chemical and dimensional characterization of the renal countercurrent system in mice. *William M. Kettyle and Heinz Valtin* 135

Factors affecting fluid movement and intercellular space formation in the toad bladder. *Byron A. Croker, Jr., and C. Craig Tisher* 145

Influence of aldosterone on sodium, water and potassium metabolism in chronic renal disease. *Robert W. Schrier and Edward M. Regal* 156

Effects of metolozone in man: Comparison with chlorothiazide. *Stephen R. Steinmuller and Jules B. Puschett* 169

Estimation of weight loss during coil dialysis. *Karl D. Nolph, Ted D. Groshong, and John F. Maher* . . . 182

Uremic and non-uremic complications in acute renal failure: Evaluation of early and frequent dialysis

on prognosis. *Dieter Kleinknecht, Paul Jungers, Jacques Chanard, Claude Barbanel, and Dominique Ganeval* 190
Abstracts, The Renal Association, October 28, 1971 197
Announcements 199

Number 4, April 1972

Glomerular filtration in single nephrons. *Fred S. Wright and Gerhard Giebisch* 201
Relationships between renal cytoplasmic and nuclear aldosterone-receptors. *Diana Marver, Daniel Goodman, and Isidore S. Edelman* 210
Effect of vasopressin on sodium transport in renal cortical collecting tubules. *Gustavo Frindt and Maurice B. Burg* 224
Renal cortical blood flow and glomerular filtration in myohemoglobinuric acute renal failure. *Marie-France Chedru, Reinhard Baethke, and Donald E. Oken* 232
The renin system: Variations in man measured by radioimmunoassay or bioassay. *Jean E. Sealey, J. Gerten-Banes, and John H. Laragh* 240
Renal effects of prostaglandin A_1 in patients with essential hypertension. *Sandra J. Lee, James G. Johnson, Charles J. Smith, and Fred E. Hatch* . . 254
Adaptation to anemia by decreased oxygen affinity of hemoglobin in patients on dialysis. *Alfred Blumberg and Hans R. Marti* 263
Announcements 271

Number 5, May 1972

Symposium on Acid-Base Homeostasis
Introduction. *Floyd C. Rector, Jr.* 273
Role of diet, gastrointestinal tract and bone in acid-base homeostasis. *Jacob Lemann, Jr. and Edward J. Lennon* 275
Mechanism of renal hydrogen ion secretion. *Gerhard Malnic and Gerhard Giebisch* 280
Control of renal production of ammonia. *Robert F. Pitts* 297
The generation and maintenance of metabolic alkalosis. *Donald W. Seldin and Floyd C. Rector, Jr.* 306
Renal acidosis. *R. Curtis Morris, Jr., Anthony Sebastian, and Elisabeth McSherry* 322
Intracellular pH. *Norman W. Carter* 341
Metabolic consequences of acid-base disorders. *Arnold S. Relman* 347
The regulation of cerebrospinal fluid pH. *Bo K. Siesjö* 360
The effects of acid-base disturbances on cardiovascular and pulmonary function. *Jere H. Mitchell, Kern Wildenthal, and Robert L. Johnson, Jr.* 375
Announcements 390

Number 6, June 1972

Compensatory renal hypertrophy in young rats: Increase in the number of nephrons. *Jean-Pierre Bonvalet, Monique Champion, Frida Wanstok, and Guy Berjal* 391
Effect of peritubular capillary perfusion rate on proximal sodium reabsorption. *Norman Bank, Hagop S. Aynedjian, and Takao Wada* 397
Effect of renin immunization on mercuric chloride and glycerol-induced renal failure. *Walter Flamenbaum, T. A. Kotchen, and Donald E. Oken* 406
Renal morphological and immunological changes associated with acute viral hepatitis. *G. Eknoyan, F. Györkey, C. Dichoso, M. Martinez-Maldonado, W. N. Suki, and P. Györkey* 413
The clinical course associated with dense deposits in the kidney basement membranes. *Bernard Antoine and Claude Faye* 420
Abstracts, The Renal Association: Haematology and the kidney, February 2, 1972 428
Announcements 430
Indexes 431
